

WEB DEVELOPMENT CERTIFICATE

Designed to Help You Succeed

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut ali

One and Done

The Web Development Certificate consists of eight courses designed to transition students from a typical web user to an entry-level Frontend Web Developer.

The suggested timeline for completing the certificate is one year: Two courses per quarter over four quarters. Admissions to the program are rolling, so you can apply anytime for the next available start date.

Fully Accredited & High Quality

Students in the Web Development Certificate will earn up to 40 college credits.

Courses are rigorous and led by knowledgeable instructors with real-world experience in the web development industry. Instruction is highly personalized and course content is updated annually to keep up with trends in the industry.

Flexible & Convenient

We know you have a busy schedule and many obligations. We want to work with you to help you get the skills and knowledge you need to transform your life.

Classes take place primarily online. You will use the latest tools to create beautiful websites and learn practical skills within the broader context of web culture and ethics. Regular face-to-face meetings allow you to connect with classmates, other developers, and potential employers.

Wholistic Education for Adult, Part-Time Students

The Web Development Certificate program is aligned with the Seattle University core mission and values statements, which define an education designed to educate all facets of the person. Web developers graduating from this program will have a broad view of the way that technology shapes and changes the world. They will better understand their role in developing responsible and ethical applications.

Technical and intellectual rigor are emblematic of the Seattle University mission, and students in the Web Development Certificate program will encounter many topics and situations requiring not just the correct technical solution, but also a social, cultural or ethical justification. Students in this program learn not only to answer the question of "how" to use technical tools, but also "why" to use one tool or approach over another.

This program is dedicated to the adult, part-time student population. In designing the program, courses, and scheduling, every effort has been made to provide flexibility and accommodation for the adult student. Courses are designed to offer adults both the depth of content they crave, and the professional skills they need.

The courses offered through the Web Development Certificate are hybrid courses: They leverage the flexibility of online content so you can engage with course materials on your own time, but they also use in-person meetings to enhance the learning experience. The in-person meetings fall into two categories: Sessions dedicated to working with faculty and peers directly on course projects, and other meetings designed to model professional development and career networking events in the industry.
